2. Analysis of anonymised user statistics

In order to conduct user research as part of the operation and further development of UNIC, user behaviour is analysed in terms of the number of consultations and downloads as recorded on the UNIC platform. This provides information on UNIC usage statistics (access figures) and the paths users take through the system. By analysing this data anonymously, UNIC staff hopes to gain insights into the needs and potential problems associated with the use of UNIC and thus be able to continuously improve the service.
